

FALL PROTECTION

One Point Harness

79205

Designed for operatives who spend long hours working at height and in fixed positions.

Designed to ensure **maximum safety** and **comfort** during use

Unisex, universal size harness

Rear attachment point with ergonomically designed **leg** and **chest** strap adjustment points for a **comfortable** fit

Lightweight design to keep the harness weight reduced but without compromising **comfort** and **strength**

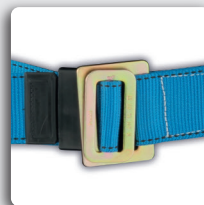

Suitable for **Work Restraint** systems

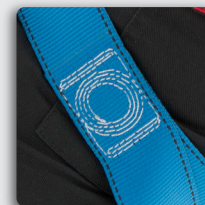

Heavy duty plastic anchor point plate to protect the wearer against impact from lanyard snap hook.

Black edge stitching to aid identification of cuts to webbing.

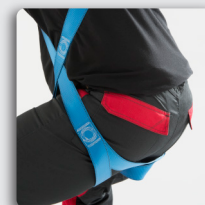

Zinc passivated metal buckles to prevent rusting of steel components and prevent webbing material from deterioration.

White circular stitching pattern to indicate post-fall condition and aid equipment inspection.

Rear single attachment point (dorsal D-ring) to minimise damage from heavy snap hooks.

Sub-pelvic strap for added support and comfort in the event of a fall.
