

FALL PROTECTION

Two Point Harness

79206

Designed to ensure maximum safety and comfort during use.

Sub-pelvic strap

ensures proper loading and position after a fall which allows the user to manipulate into a seated position and reduce suspension trauma

Unisex, universal size harness

Rear attachment point with ergonomically designed **leg, chest** and **shoulder** strap adjustment points for a **comfortable** fit

Blue harness with yellow chest and rear strap for **high visibility**

Lightweight design to keep the harness weight reduced but without compromising **comfort** and **strength**

Suitable for **Rope Lifeline, Fall Arrest and Work Restraint** systems

Front and rear anchor attachment points.

Zinc passivated metal buckles to prevent rusting of steel components and prevent webbing material from deterioration.

Sub-pelvic strap for added support and comfort in the event of a fall.

Black edge stitching to aid identification of cuts to webbing.

Plated dorsal D-ring anchor point with adjustable heavy duty back plate to protect wearer against impact from sharp/heavy snap hooks and self-retracting lifelines.

White circular stitching pattern to indicate post-fall condition and aid equipment inspection.
